AI Builder Cup 2026

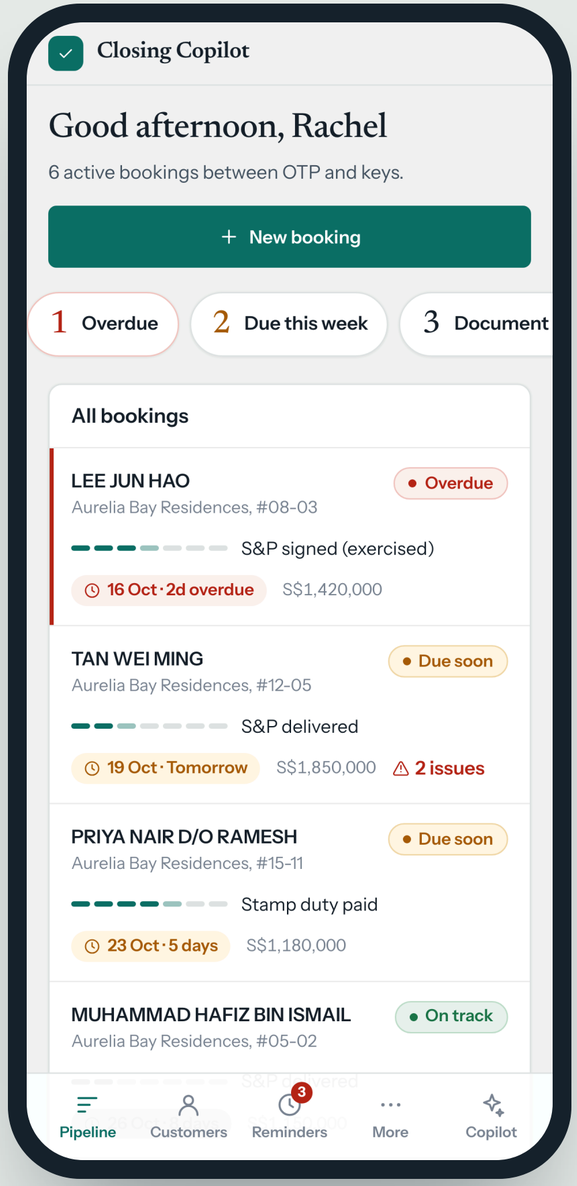

Closing Copilot

The AI copilot that helps property agents close on time — and keep every client for life.

Problem statement: **Future of Work & Enterprise Productivity**

Team: theana

Built on Google Cloud: Gemini, Agent Development Kit, Document AI, Cloud Run

The problem

A new-launch purchase is a chain of legal deadlines that all run from one date.

Day 0

Option to Purchase

The date everything counts from

Within 14 days

S&P delivered

within 14 days of the OTP

Within 3 weeks

Buyer signs the S&P

or the option lapses and 25% of the booking fee is forfeited

Within 14 days

Buyer's & Additional Buyer's Stamp Duty

within 14 days of signing

Within 8 weeks

15% downpayment

within 8 weeks

A lapsed option costs **$17,750** on a $1.42M unit. Every document must match the verified buyer exactly. Client conversations live in WhatsApp, and after handover the relationship is forgotten.

> Knowledge is scattered, deadlines are manual, and the most valuable asset — the client relationship — isn't captured anywhere.

Who we help

CEA-registered property agents selling new launches — individuals and agencies.

Their day

Showflat viewings, WhatsApp threads, document chasing, and after-sales favours: tenants, furnishing, tax questions.

What they need

One place that knows every deal, every client and every date.

— and does the paperwork reading for them.

The solution

Four jobs, one copilot.

Close

Reads IDs, OTPs, S&Ps and receipts; cross-checks them; tracks every legal deadline.

Capture

Turns WhatsApp and profile screenshots into a CRM record with dated follow-ups.

Match

Recommends projects from a catalog of 24 real 2025–26 launches.

Care

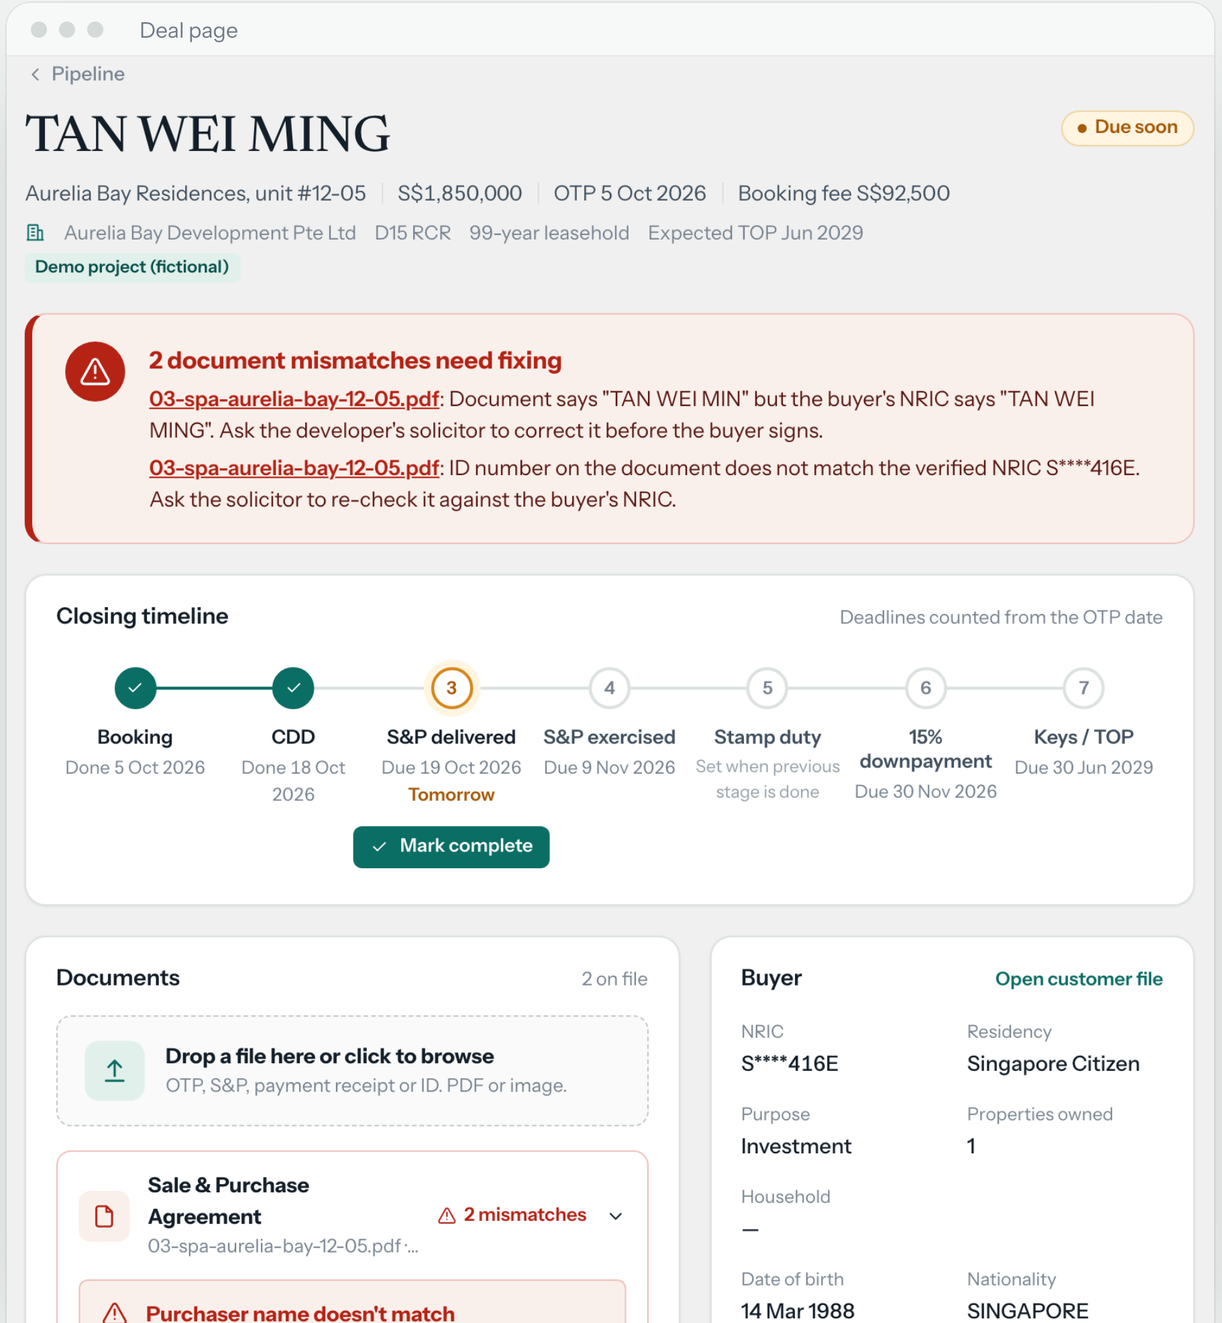

After-sales: family & important dates (with consent), tenancy, furnishing, tax reminders.

Plus a **Copilot agent** you can ask anything:
“What do I need to do today?”

Close

Documents that check themselves.

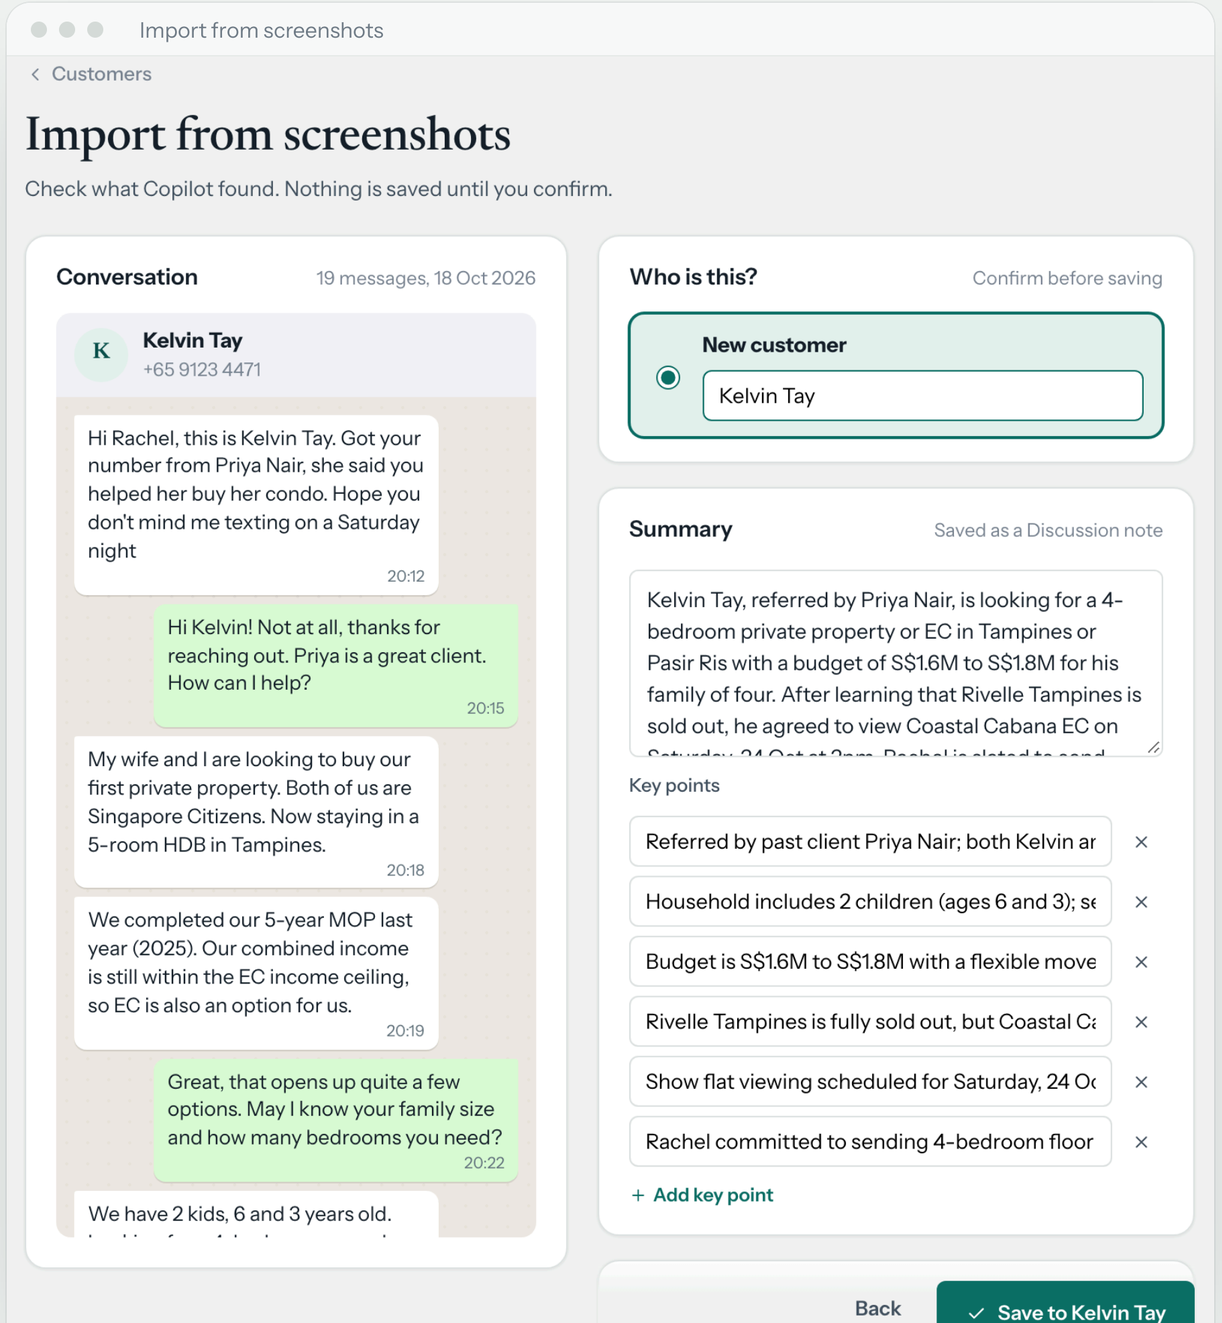

- NRIC photo → Document AI OCR → Gemini extraction → customer + due-diligence record **(13 s in our test, tilted phone photo)**
- S&P uploaded → caught **“TAN WEI MIN” vs “TAN WEI MING”** and two swapped NRIC digits before signing
- Gemini reads; **deterministic code compares** — every flag is explainable
- NRIC masked outside the customer record; ID image not stored (PDPA data minimisation)

Capture

WhatsApp → CRM in one review.

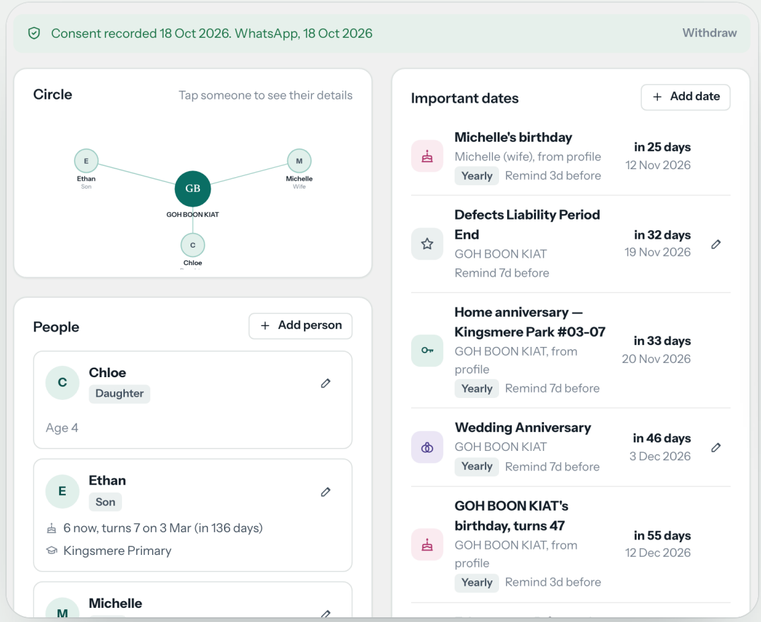

- 2 screenshots → **19 messages**, summary, key points, budget, family, EC eligibility hints
- Dated follow-ups for every promise: “Send floor plans by Tue 20 Oct”, “Viewing Sat 24 Oct”
- Finds the existing customer (phone/name match) or proposes a new one
- **Agent confirms before anything is saved**

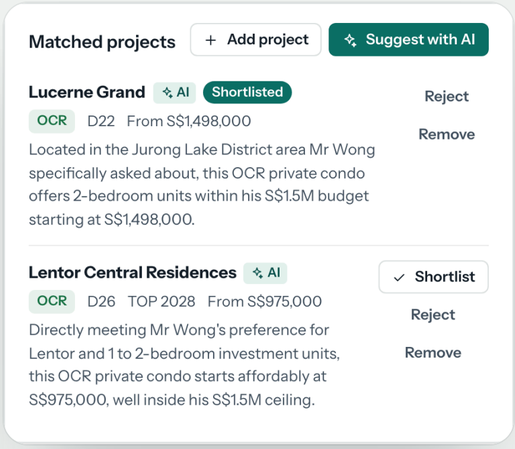

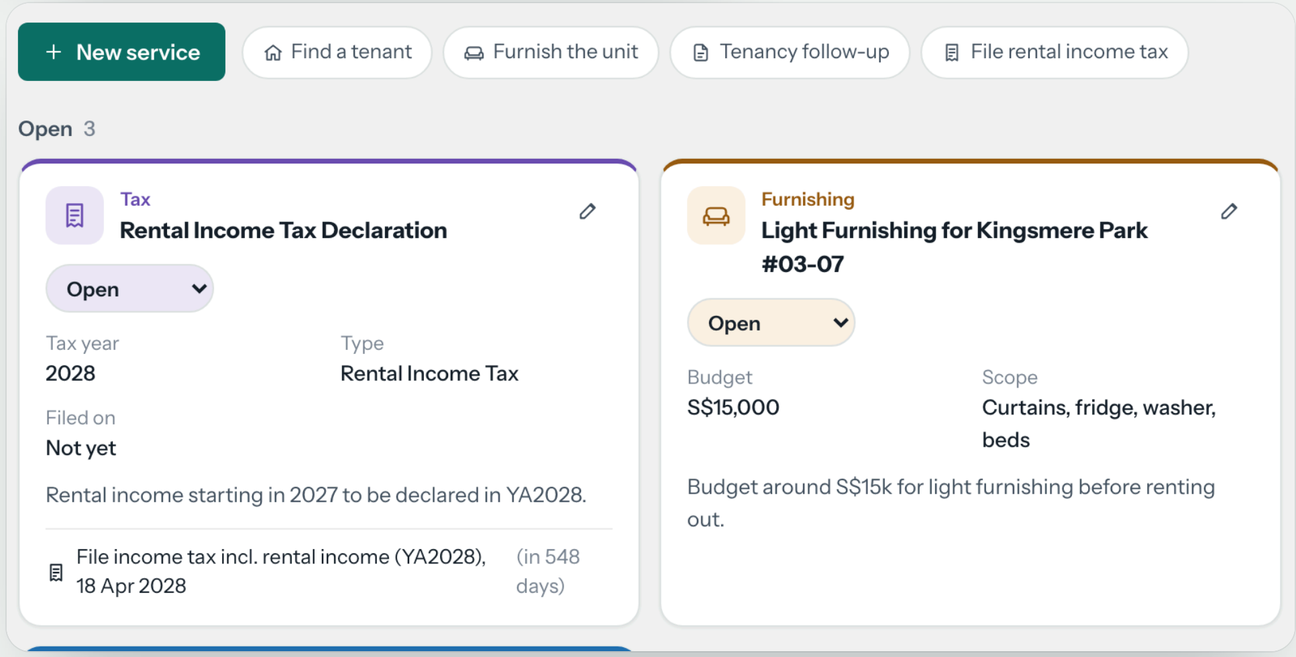

Match & care

From first match to a client for life.

- AI matches budget, area, bedrooms and EC eligibility to the project catalog, **with reasons**
- Builds the client's circle — spouse, children, advisors — **only with recorded consent**; withdrawal deletes it
- After-sales: find a tenant, furnishing, tenancy follow-up, rental-income & property-tax filing
- Company research with **Gemini + Google Search grounding**, saved with sources (company-level only)

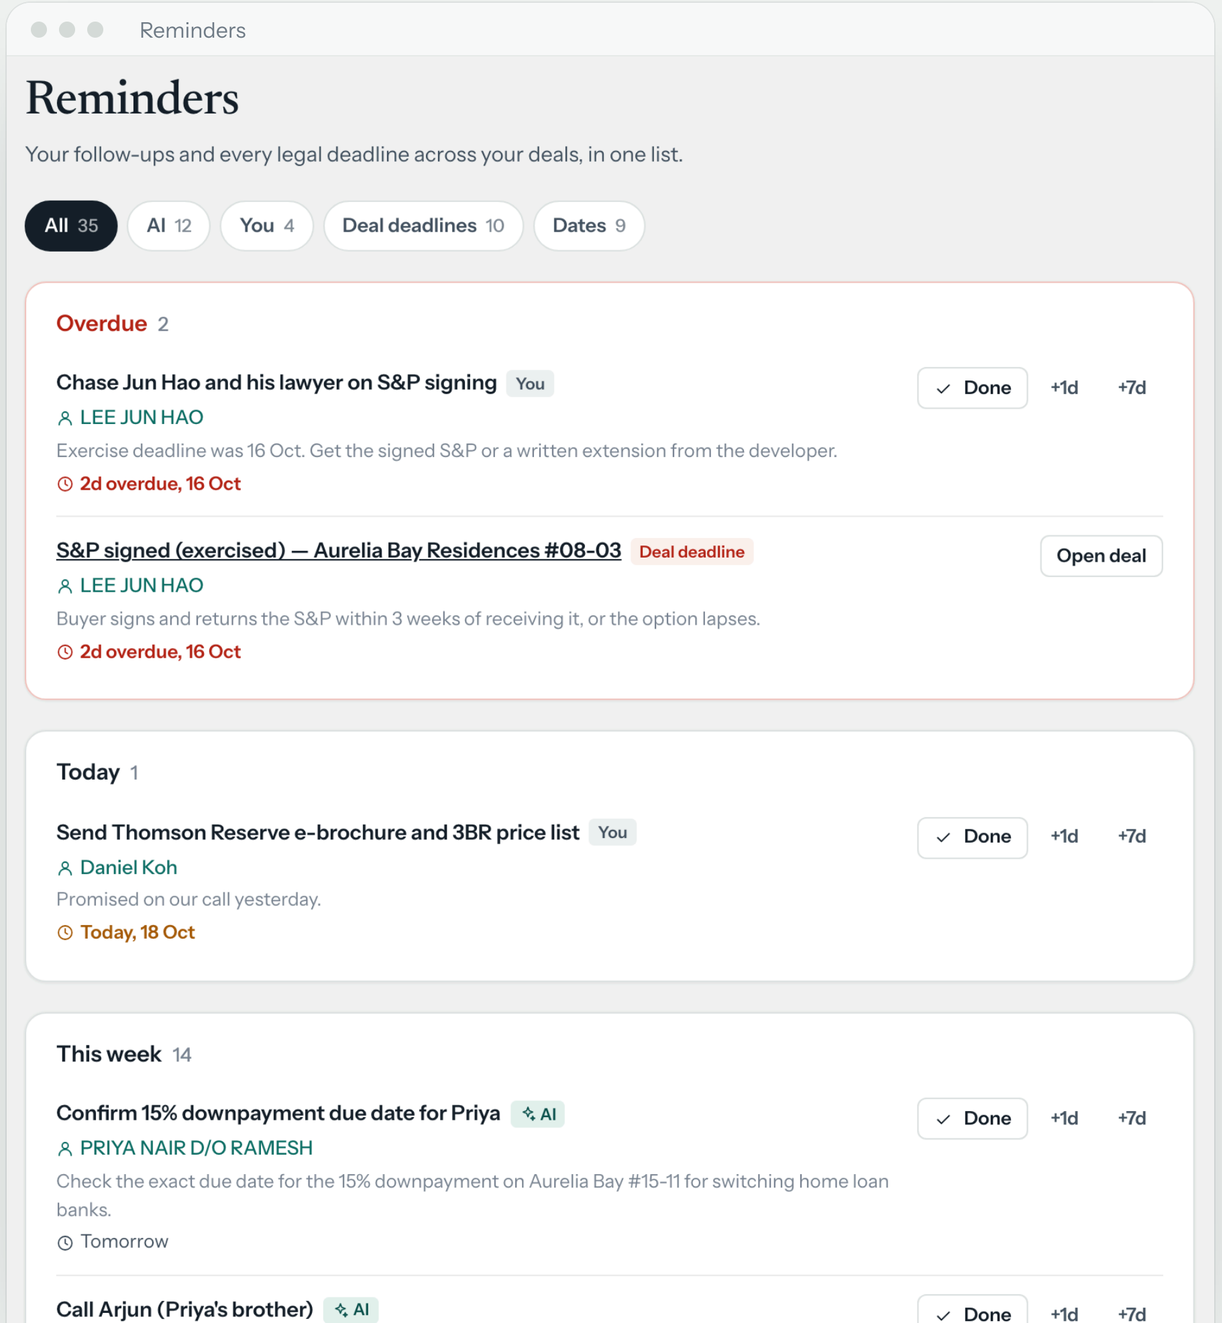

Reminders

One list for everything.

- Agent's own reminders
- AI-suggested follow-ups
- Legal deal deadlines
- Birthdays & anniversaries
- Lease renewals
- Tax deadlines

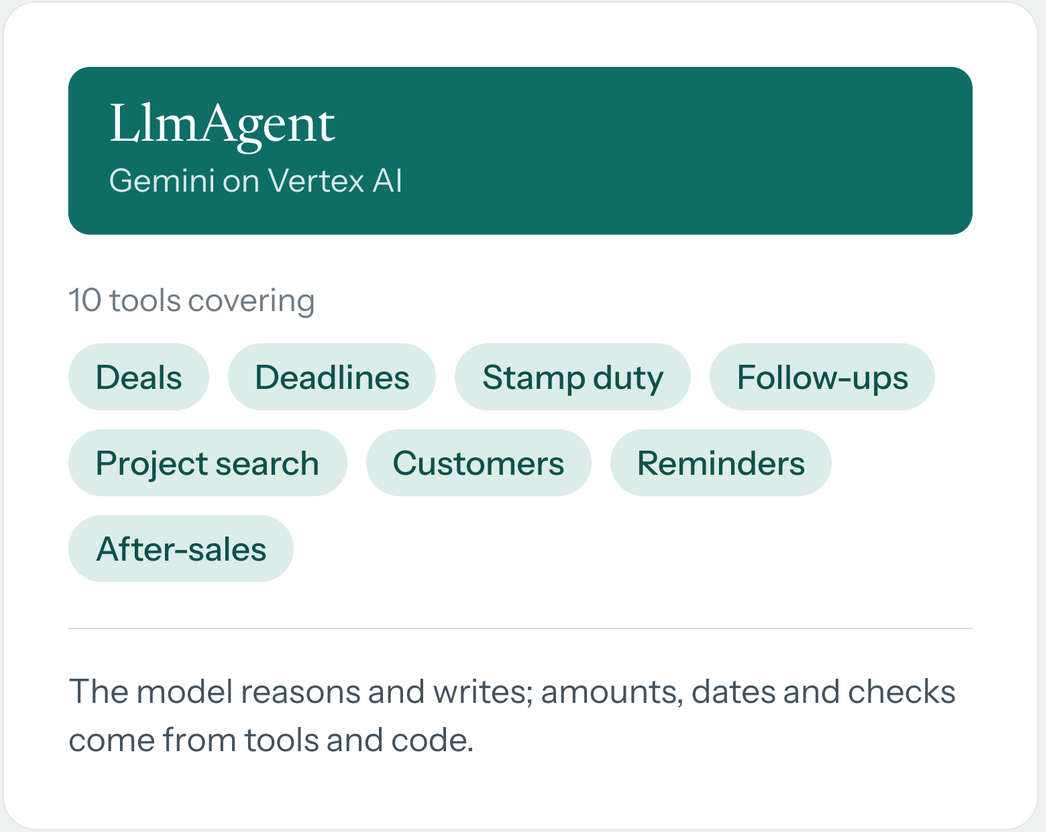

"Send wishes" → Copilot drafts a warm, non-salesy message.

The Copilot agent

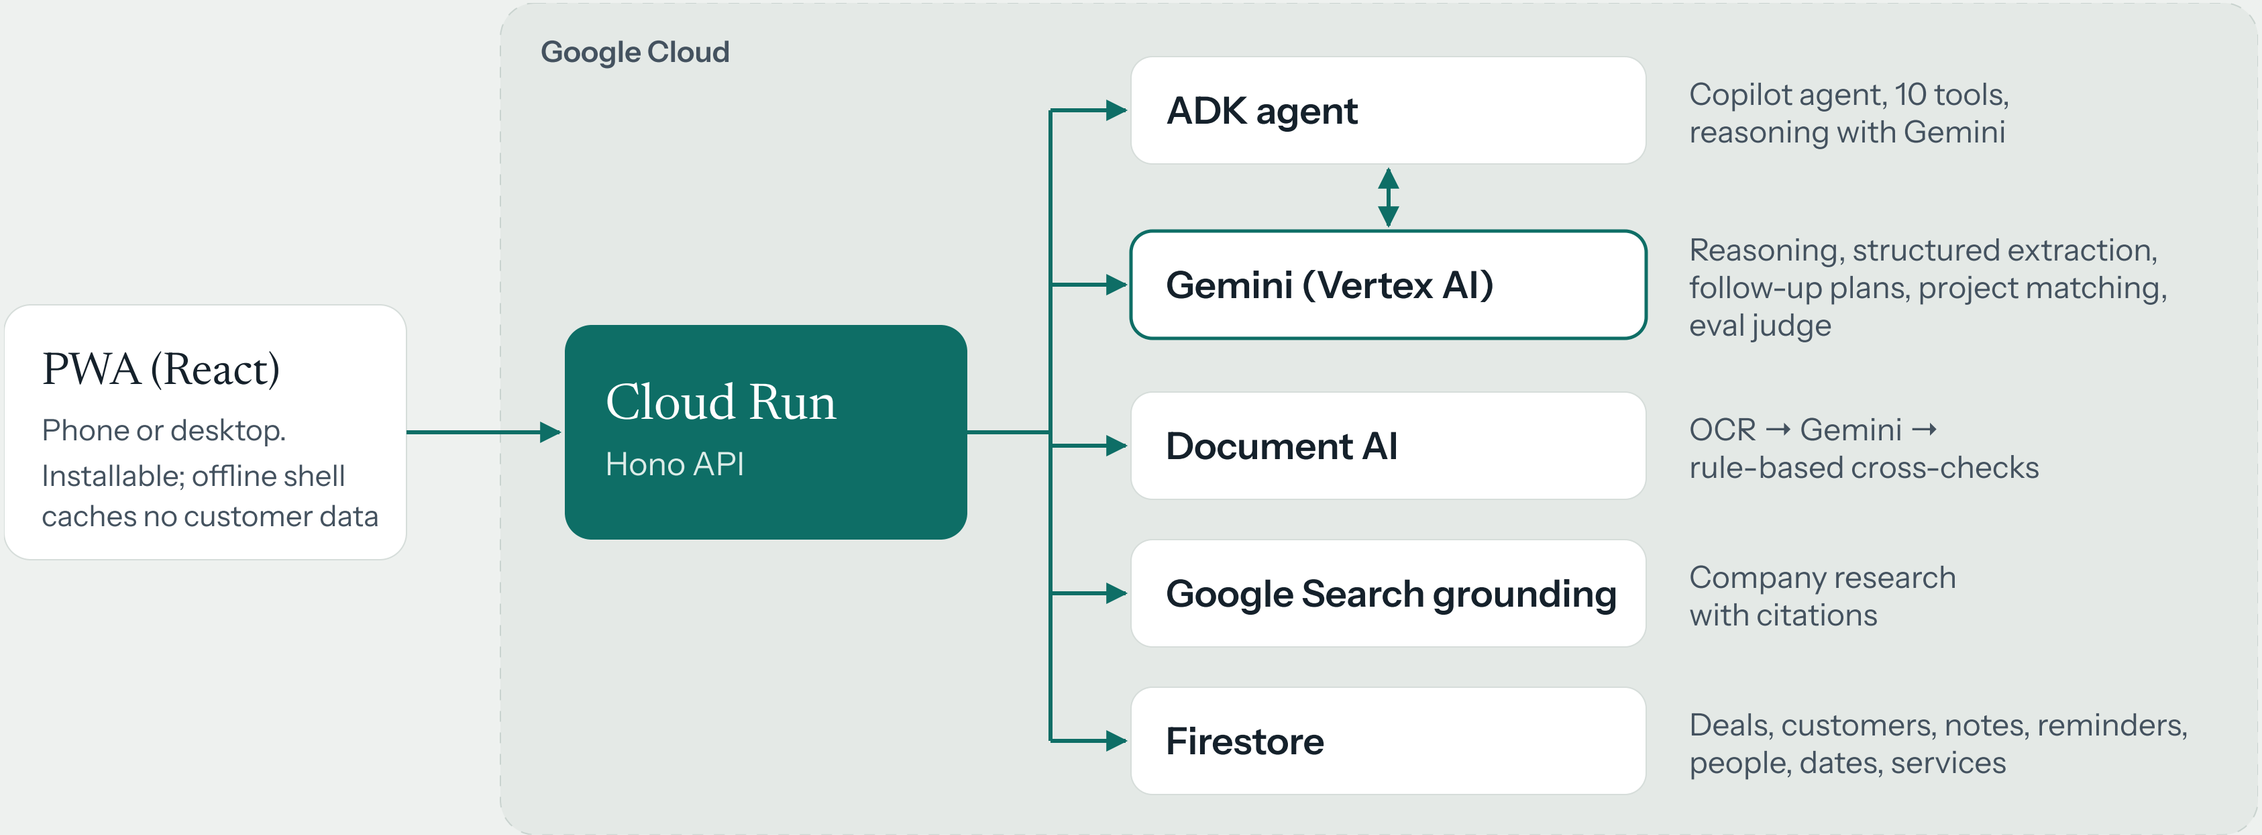

Built with the Agent Development Kit.

- **ADK (TypeScript)** — one LlmAgent with 10 tools
- Facts only from tools; **stamp duty computed in code** (IRAS 2023 rates), never by the model
- Knows what you're looking at — deal or customer — and streams answers
- Refuses to reveal full NRIC numbers

Architecture

One API on Cloud Run, Gemini at the centre.

Responsible by design, and measured

Trust is part of the product.

PDPA

Consent before storing anyone's circle; NRIC masking; images not stored; data minimisation

Human in the loop

Every AI import is reviewed; stage changes need the agent

Grounded

Dates, amounts and checks come from documents, code and tools

7/7 pass

End-to-end agent cases, scored on tool use + Gemini judge

- ✓ Priorities
- ✓ Stamp duty
- ✓ Mismatch-first
- ✓ NRIC refusal
- ✓ After-sales
- ✓ Drafting
- ✓ Project catalog

Impact & what's next

Close on time. Keep every client.

Impact for an agent

Fewer missed legal deadlines, document errors caught before signing, follow-ups never lost in chat, and relationships that turn into referrals and repeat purchases.

Next

- WhatsApp Business API instead of screenshots
- Google Calendar sync
- Team and agency dashboards
- Resale and HDB flows
- Voice notes after viewings (Gemini Live)
- Agent Engine deployment
